## WASSCE / WAEC ELECTIVE / FURTHER MATHEMATICS SYLLABUS

Visit this link to read the introductory text for this syllabus.

| AREAS COMMON TO THE TWO ALTERNATIVES |  |  | ADDITIONAL TOPICS /NOTES FOR ALTERNATIVES |  |
| :---: | :---: | :---: | :---: | :---: |
| TOPIC | CONTENT | NOTES | ALTERNATIVE X <br> (For Candidates offering Further Maths) | ALTERNATIVE Y <br> (For Candidates offering Maths Elective) |
| 1. Circular Measure and Radians | Lengths of Arcs of circles Perimeters of Sectors and Segments measure in radians |  |  |  |
| 2. Trigonometry | (i) Sine, Cosine and Tangent of angles <br> (ii) Trigonometric ratios of the angles $30^{\circ}, 45^{\circ}, 60^{\circ}$ <br> (iii) Heights and distances <br> (iv) Angles of elevation and depression <br> (v) Bearings, Positive and negative angles. <br> (vi) Compound and multiple angles. <br> (vii) Graphical solution of simple trig. equation. <br> (viii) Solution of triangles. | For $\mathrm{O}^{0} \leq \theta \leq 360^{0}$ <br> Identify without use of tables. <br> Simple cases only. <br> Their use in simple Identities and solution of trig. ratios. $a \cos x+b \sin x=c$ <br> Include the notion of radian and trigonometric ratios of negative angles. |  |  |
| 3. Indices, Logarithms and Surds. <br> (a) Indices <br> (b) Logarithms | (i) Elementary theory of Indices. <br> (ii) Elementary theory of Logarithm $\begin{aligned} & \log _{a} x y=\log _{a} x+\log _{a} y, \\ & \log _{a} x_{n}=\operatorname{nlog}_{a} x \end{aligned}$ <br> (iii) Applications | Meaning of $a^{0}, a^{-n}, a^{\frac{1}{n}}$ <br> Calculations involving multiplication, division, power and nth roots: $\log a^{n}, \log \sqrt{a,} \log a^{\frac{1}{n}}$ <br> Reduction of a relation |  |  |

$$
\begin{aligned}
& \text { such as } y=a x^{b},(a, b \\
& \text { are constants }) \text { to a linear } \\
& \text { form. } \\
& \log _{10 y}=b \log _{10} x+\log _{10 a} . \\
& \text { Consider other examples } \\
& \text { such as } \mathrm{y}=a b^{x} .
\end{aligned}
$$

| :---: | :---: | :---: | :---: | :---: |
| TOPIC | CONTENT | NOTES | ALTERNATIVE $X$ <br> (For Candidates offering Further Maths) | ALTERNATIVE Y <br> (For Candidates offering Maths Elective) |
| (c) Surds <br> (d) Sequences: Linear and Exponential sequences <br> (e) Use of the Binomial Theorem for a positive integral index. | Surds of the form $\frac{a,}{\sqrt{b}} \quad a \sqrt{\bar{a}} \text { and } a+b \sqrt{n}$ <br> where $a$ is rational. $b$ is a positive integer and $n$ is not a perfect square. <br> (i) Finite and infinite sequences <br> (ii) $U_{n}=U_{1}+(n-1) d$, where $d$ is the common difference. <br> (iii) $S_{n}=\frac{n}{2}\left(U_{1}+U_{n}\right)$ <br> (iv) $U_{n}=U_{1} r^{n-1}$ <br> where $r$ is the common ratio. <br> (v) $\mathrm{S}_{n}=\frac{U_{1}\left(1-\mathrm{r}^{n}\right)}{1-r} ; \mathrm{r}<1$ <br> or $\left.\mathrm{S}_{n}=\underline{U}_{\underline{1}} \frac{\left(r^{n}\right.}{r-1}=\underline{1}\right) ; \mathrm{r}>1$ <br> Proof of Binomial Theorem not required. <br> Expansion of $(a+b)^{n}$ <br> Use of $(1+x)^{n} \approx 1+n x$ for any rational $n$, where $x$ is sufficiently small e.g. $0(0.998)^{1 / 3}$ | Rationalisation of the Denominator: $\frac{a+\sqrt{b}}{\sqrt{c}-\sqrt{d}}$ |  |  |
| 4. Algebraic Equations | (a) Factors and Factorisation. Solution of Quadratic equations using:- <br> (i) completing the square, <br> (ii) formula. <br> (a) Symmetric properties of the equation $a x^{2}+b x+c=0$ <br> (b) Solution of two simultaneous equations where one | The condition $b^{2}-4 a c \geq 0$ for the equation to have real roots. <br> Sum and product of roots. <br> Graphical and analytical |  |  |

is linear and the other methods permissible. quadratic.

WASSCE / WAEC ELECTIVE / FURTHER MATHEMATICS SYLLABUS

| AREAS COMMON TO THE TWO ALTERNATIVES |  |  | ADDITIONAL TOPICS /NOTES FOR ALTERNATIVES |  |
| :---: | :---: | :---: | :---: | :---: |
| TOPIC | CONTENT | NOTES | ALTERNATIVE X <br> (For Candidates offering Further Maths) | ALTERNATIVE Y <br> (For Candidates offering Maths Elective) |
| 7. Linear Inequalities | Graphical and Analytical Solution of simultaneous linear Inequalities in 2 variables and Quadratic inequalities. |  |  |  |
| 8. Logic | (i) The truth table, using not $\mathbf{P}$ or $\mathbf{Q}, \mathbf{P}$ and $\mathbf{Q}$. $\mathbf{P}$ implies $\mathbf{Q}, \mathbf{Q}$ implies $\mathbf{P}$. <br> (ii) Rule of syntax: true or false statements, rule of logic applied to arguments, implications and deductions | Validity of compound statements involving implications and connectives. <br> Include the use of symbols: $\sim P$ $p \vee q, p^{\wedge} q, p \Rightarrow q$ <br> Use of Truth tables. |  |  |
| 9. Co-ordinate Geometry: Straight line | (a) (i) Distance between two points; <br> (ii) Mid-point of a line segment; <br> (iii) Gradient of a line; <br> (iv) Conditions for parallel and perpendicular lines. <br> (b) Equation of a line: <br> (i) Intercept form; <br> (ii) Gradient form; <br> (iii) The general form. <br> (c) (i) Equation of a circle; <br> (ii) Tangents and normals are required for circle. | Gradient of a line as ratio of vertical change and horizontal change. <br> (i) Equation in terms of centre and radius e.g. $(x-a)^{2}+(y-b)^{2}=r^{2} ;$ <br> (ii) The general form: $\begin{aligned} & x^{2}+y^{2}+2 g x+2 f y+ \\ & c=0 ; \end{aligned}$ | (iii) Equations of parabola in rectangular Cartesian coordinates. |  |
| 10. Differentiation | (a) (i) The idea of a limit | (i) Intuitive treatment of limit. Relate to the |  |  |

| gradien of a curve. |

WASSCE / WAEC ELECTIVE / FURTHER MATHEMATICS SYLLABUS

(ii) Definite Integral
(ii) Simple problems on integration by substitution.

WASSCE / WAEC ELECTIVE / FURTHER MATHEMATICS SYLLABUS

| AREAS COMMON TO THE TWO ALTERNATIVES |  |  | ADDITIONAL TOPICS /NOTES FOR ALTERNATIVES |  |
| :---: | :---: | :---: | :---: | :---: |
| TOPIC | CONTENT | NOTES | ALTERNATIVE X <br> (For Candidates offering Further Maths) | ALTERNATIVE Y <br> (For Candidates <br> offering Maths <br> Elective) |
|  | (iii) Applications of the definite integral | (iii) Plane areas and Rate of change. |  | (iii) Volume of solid of revolution. <br> (iv) Approximation restricted to trapezium rule. |
| 12. Sets | (i) Idea of a set defined by a property. <br> Set notations and their meanings. <br> (ii) Disjoint sets, Universal set and Complement of set. <br> (iii) Venn diagrams, use of sets and Venn diagrams to solve problems. <br> (iv) <br> Commutative and Associative laws, Distributive properties over union and intersection | $\{x: x$ is real $\}, \cup, \cap$ empty set $\}, \varnothing, \in, \notin, C$, U (universal set) or $A^{1}$ (C <br> A (Complement of set A). |  |  |
| 13. Mappings and Functions | (i) Domain and co-domain of a function. <br> (ii) One-to-one, onto, identity and constant mapping; <br> (iii) Inverse of a function; <br> (iv) Composition of functions. | The notation: e.g. $\begin{aligned} & f: x \rightarrow 3 x+4 \\ & g: x \rightarrow x^{2} \end{aligned}$ <br> where $x \in R$. <br> Graphical representation of a function. <br> Image and the range. <br> Notation: $\mathrm{fog}(x)=\mathrm{f}(\mathrm{g}(x))$ <br> Restrict to simple algebraic functions only. |  |  |

| :---: | :---: | :---: | :---: | :---: |
| TOPIC | CONTENT | NOTES | ALTERNATIVE X <br> (For Candidates offering Further Maths) | ALTERNATIVE Y <br> (For Candidates offering Maths Elective) |
| (c) Determinants |  |  | Evaluation of determinants of $2 \times 2$ and $3 \times 3$ matrices. <br> Application of determinants to: <br> (i) Areas of triangles and quadrilaterals. <br> (ii) Solution of 3 simultaneous linear equations |  |

PART II
STATISTICS AND PROBABILITY

| AREAS COMMON TO THE TWO ALTERNATIVES |  |  | ADDITIONAL TOPICS /NOTES FOR ALTERNATIVES |
| :---: | :---: | :---: | :---: |
| TOPIC | CONTENT | NOTES | ALTERNATIVE X <br> (For Candidates <br> offering Further <br> Maths)ALTERNATIVE Y <br> (For Candidates <br> offering Maths <br> Elective) |
| 1. Graphical representation of data | (i) Frequency tables. <br> (ii) Cumulative frequency tables. <br> (iii) Histogram (including unequal class intervals) <br> (iv) Frequency curves and ogives for grouped data of equal and unequal class intervals. |  | $\square+$ |
| 2. Measures of location | Central tendency; <br> Mean, median, mode, quartiles and percentiles | Include: <br> (i) Mode and modal group for grouped data from a histogram; <br> (ii) Median from grouped data and from ogives; <br> (iii) Mean for grouped data, use of an assumed mean required. |  |
| 3. Measures of Dispersion | (a) Determination of: <br> (i) Range, Inter-Quartile range from an ogive. <br> (ii) Variance and standard deviation. | Simple applications. <br> For grouped and ungrouped data using an assumed mean or true mean. |  |
| 4. Correlation | (i) Scatter diagrams | Meaning of correlation: positive, negative and zero correlations from scatter diagrams. | Rank correlation Spearman's Rank Correlation Coefficient. <br> Use data without ties |

| (ii) $\quad$ Line of fit | Use of line of best fit to <br> predict one variable from <br> another. | Meaning and <br> applications. |
| :--- | :--- | :--- |

| :---: | :---: | :---: | :---: | :---: |
| TOPIC | CONTENT | NOTES | ALTERNATIVE X <br> (For Candidates offering Further Maths) | ALTERNATIVE Y <br> (For Candidates offering Maths Elective) |
| 5. Probability | Meaning of probability Relative frequency Calculation of Probability. Use of simple sample spaces. Addition and multiplication of probabilities. | E.g. tossing 2 dice once, drawing balls from a box without replacement. Equally likely events and mutually exclusive events only to be used. | Probability Distribution. <br> Binomial Probability $\mathrm{P}(x=r)={ }^{n} C_{r} p^{r} q^{n-r}$ <br> where Probability of success $=P$ <br> Probability of failure $=q, p+q=1$ and n is the number of trials. Simple problems only. |  |
| 6. Permutations and Combinations. | Simple cases of number of arrangements on a line. <br> Simple cases of combination of objects. | e.g. (i) arrangement of students in a row. <br> (ii) drawing balls from a box. Simple problems only. $\begin{aligned} & { }^{n} P_{r}=\frac{n!}{(n-r)!} \\ & { }^{n} C_{r}=\frac{n!}{r!(n-r)!} \end{aligned}$ |  |  |

PART III
VECTORS AND MECHANICS

| AREAS COMMON TO THE TWO ALTERNATIVES |  |  | ADDITIONAL TOPICS /NOTES FOR ALTERNATIVES |  |
| :---: | :---: | :---: | :---: | :---: |
| TOPIC | CONTENT | NOTES | ALTERNATIVE X <br> (For Candidates offering Further Maths) | ALTERNATIVE Y <br> (For Candidates offering Maths Elective) |
| 1. Vectors | (i) Definitions of scalar and vector quantities. <br> (ii) Representation of Vectors. (iii) Algebra of vectors <br> (iv) Commutative, Associative and Distributive properties. <br> (v) The parallelogram Law. <br> (vi) Unit Vectors. | (iii) Addition and subtraction of vectors, <br> Multiplication of vector by vectors and by scalars. <br> Equation of vectors. <br> (iv) Illustrate through diagram, diagrammatic representation. Illustrate by solving problems in elementary plane geometry e.g. concurrency of medians and diagonals. <br> The notation <br> i for the unit vector $\left[\begin{array}{c} 1 \\ 0 \end{array}\right] \text { nd }$ <br> j for the unit vector $\left[\begin{array}{l} 0 \\ \hline \end{array}\right.$ |  |  |

along the $x$ and $y$ axis
respectively.
(vii) Position and free Vectors.
