1. **PREAMBLE**

   Social Studies is a study of the contemporary problems of the society. The subject prepares the individual to fit into society by equipping him/her with knowledge about the culture or ways of life of their society, its problems, its values and its hopes for the future. The subject is multidisciplinary and takes its source from many subjects, e.g., Geography, History, Sociology, Psychology, Economics and Civic Education. Essential elements of the knowledge and principles from these disciplines are integrated into a subject that stands on its own. As a subject Social Studies helps students to understand their society better; helps them to investigate how their society functions and hence assists them to develop that critical and at the same time developmental kind of mind that transforms societies. Our society has been a slow moving one. It is hoped that the course will enable students understand the social, cultural, environmental, political and economic issues in the Ghanaian society better. This will enable them to examine the society’s institutions and ways of life with critical and constructive mind. Through this, the country will surely be on the path to better and faster growth and development.

2. **EXAMINATION OBJECTIVES**

   The examination syllabus is aimed at testing candidates’

   (1) Understanding of the components of positive attitudes and values towards individual and societal issues.

   (2) Knowledge of the components of society and their role.
